

OverTheWire: Wargames-Bandit:

1. Level 0-1:
 - a. Used “ls” and “cat readme” to get the password.
2. Level 1-2:
 - a. Had to search on how to handle dashed file names with commands.
 - b. Used the command “cat ./-“ to get the password.
3. Level 2-3:
 - a. Used the command "cat spaces/ in/ this/ filename" to get the password since the name of the file was “spaces in this filename”
4. Level 3-4:
 - a. Used “ls” to check and found a directory called “inhere” and used “cd inhere/” to move to it.
 - b. Once inside I used the command “ls -a” to search for hidden files and found a file named “.hidden”.
 - c. Finally, used the command "cat .hidden" and got the password.
5. Level 4-5:
 - a. Used “cd inhere/” to enter the directory.
 - b. Next I used “ls” and found that there were ten files that all started with the pattern “-file0”.
 - c. As a result, I used the command “file ./-file0{0,1,2,3,4,5,6,7,8,9}” to get the information of all the files and found that “-file07” was an ASCII text.
 - d. Finally, used “cat ./-file07” and got the password.
